

Natdanai Kanyakoon

Bangkok, Thailand

E-mail: moss10612@gmail.com | Mobile: (+66) 83 653 6262

A Software Developer with 3+ years of experience delivering production-grade web applications. Specialized in React and TypeScript with a focus on scalable architecture and complex business logic. Experienced in building systems used in enterprise and financial domains. Collaborative team player with a strong sense of ownership and attention to detail.

WORK EXPERIENCE

Odd-e Thailand, (Jan 2023 - Present) - Frontend Developer

Core Banking Web Application — TTB Bank (Thailand)

- Contributed to the frontend development of FINOVA, a core banking web application replacing a legacy system at TTB Bank using **React.js** and **TypeScript**
- Built and maintained a **shared UI component library (SDK-like module)** used across multiple micro-frontend applications to ensure consistency and scalability
- Developed user-facing workflows for core financial operations, including deposits, withdrawals, transfers, and cheque-related processes
- Worked within a **micro-frontend architecture** using **module federation**, enabling independent development and deployment of frontend modules
- Implemented and maintained end-to-end testing using **Cypress** to improve application reliability and reduce regression issues across critical banking workflows.

The Stock Exchange of Thailand (SET) - Corporate Value Up

- Contributed to the frontend development of a project under the SET Corporate Value Up initiative
- Built and maintained complex, multi-step forms using **React** and **TypeScript**
- Managed form state with **react-hook-form** and implemented schema-based validation using **Yup**
- Developed reusable, type-safe UI and form components using **Material UI (MUI)**

The Stock Exchange of Thailand (SET) - LiVE Exchange

- Contributed to the frontend development of LiVE Exchange, a digital platform supporting SME and startup fundraising
- Built and maintained user-facing features using **Next.js** and **TypeScript**
- Implemented scalable, type-safe UI components to support complex, data-driven interfaces using **Mantine UI**

The Stock Exchange of Thailand (SET) - SET LiVE Platform

- Contributed to the frontend revamp of the LiVE Platform, redesigning and rebuilding the UI from the ground up using **Next.js** and **TypeScript**
- Implemented **mobile-first** responsive interfaces supporting desktop, tablet, and mobile devices.
- Converted Figma design systems into reusable React components

INSKRU.com

- Developed and maintained the frontend of an educational community platform for teachers using **Next.js** and **TypeScript**
- Built user-facing features for browsing, searching, and sharing teaching ideas and classroom resources
- Implemented responsive UI components to support mobile, tablet, desktop and improve usability for educators

BKK FOOD BANK

- Developed a frontend web application for managing food donations and distributions to underprivileged communities, using **React.js** and **TypeScript**

Dosetech Co., Ltd. (Oct 2022 - Dec 2022) - Frontend Developer

- Developed a website **SKL (สยามคูโบต้า ลีสซิ่ง)** for agricultural and construction machinery loans, leasing services, and online loan applications
- The platform utilizes **Vue.js**, **Linelf**

SKILLS
